121	AE22P731001	28-12-2022	PINAKA AEROSPACE SOLUTIONS PVT LTD	TGT Amplifier		1021.55	<p>The development order was placed based on L1 basis against limited tendering, considering the landed cost including series production cost of 30 Nos. The tender was issued to two capable vendor based on their experience in repair of the OEM supplied units.</p> <p>Currently, the supplier is not accepting the same price for even qty 30 Nos as agreed in the previous PO. At the time of development PO, only qty 30 Nos were anticipated and now customer order was received for qty 55 Nos. On re-evaluation with the present quoted price for series production (Rs.19.80 Lakh), it is found that the landed prices calculated for M/s.Pinaka is more that the prices quoted by L2 offer in the developmental tender.</p> <p>During the process of development, three software and hardware mods were implemented based on test results and hence there is change in the spec of the product initially specified and finally certified.</p> <p>Digital TGT Amplifier is a technologically challenging and flight safety critical unit. As the development of alternate source is associated with long time period for development, cost of development and risk of failure resulting in delay unavailability of product. Considering critical requirement of units in fleet, AOG requirement and obsolescence of existing amplifier, it is proposed to procure the already certified units from same source.</p> <p>In view of the above, it was proposed to purchase the units on single tender (nomination) basis in place of proprietary tender. The CFA for placement of PO as per DoP under C4, is CMD and chairman of PNC was Director (Engg and R &amp; D).</p>	Single tender basis	Digital TGT Amplifier of Adour MK804 Engine
